

"C-100/200" & "COUNT-100/200"

Heavy-Duty Digital Label Counters and Counting Packages

The **PC-1 Label Counter** is a popular option on our **S-100** and **S-200 Label Slitters**. Many times, however, users don't need to slit labels, just count them. To save users money, LABELMATE has **Label Counter Units** and **Complete Counting Station Packages** based on the **S-100** and **S-200** Slitter chasses but without the Slitter function. The **C-100** and **C-200** will handle label webs up to 6.5- and 10-inches wide respectively. A **CAT-2** Rewinder is used to pull the labels through the counter. The versatile Counters can be used at the output of a printer, or can be used with an Unwinder and a **CAT-2 Rewinder** to form a stand-alone off-line label inspection / counting station.

Model C-100 Label Counter for webs up to 6.5". C-200 has similar appearance, and handles label webs up to 10" wide.

The **C-100** and **C-200** Counters can count up or count down from a preset count to zero as you wish. If desired, when the pre-set count is reached, the **C-100** or **C-200** will send a "HALT" signal to the **CAT-2 Rewinder**, causing it to stop.

The Counters have lots of versatility. For example, if you want to count labels that are 3-up on your label web, you can set the Counter scaling factor to three and it will read out the actual number of labels that have passed the sensor. The state-of-the-art infra-red sensor shines through the label web and detects the gap between successive labels. There must be a gap between successive labels for the Counter to work. The Counter Circuitry is completely digital and automatically adjusts for different opacity of label webs.

Quality and reliability are cornerstones of the LABELMATE Product Line. Rugged, heavy-gauge welded steel construction and precision parts yield a product of the highest quality. LABELMATE Products are trouble-free and covered by our famous **3-Year Parts and Labor Limited Warranty**, the longest in the industry.

Save even more on a complete Off-Line **COUNT-100** or **COUNT-200 Package** that includes the Counter plus a Rewinder and an Unwinder. Please see the Catalog and Price List for complete information about available configurations.

The COUNT-100 Counting Station Package includes a CAT-2 Rewinder and an Unwinder.

Put a LABELMATE Heavy-Duty **Label Counter** to work for you, today! If you need to slit labels, be sure to check out the **SLIT-100** and **SLIT-200** Complete **Off-Line Slitting Stations** that are also available with the label counting function described here.
