

# S-100-SP

## Self-Powered Label Slitter

The new **S-100-SP Self-powered Label Slitter** simplifies label slitting by providing powered pinch rollers to pull the labels through the cutting blades rather than having to rely on a Label Rewinder to pull the labels. This results in a constant cutting speed and means you can rewind using any LABELMATE Rewinder equipped with a "Quick-Chuck." Because the **S-100-SP** is self-powered, you can reliably use more cutting blades than on a Slitter that is powered by a Rewinder. You can add additional **BH-1** Blade Holders for a total of five across the maximum label width of 6" (152-mm).

The **S-100-SP** is a great choice for your off-line label slitting needs.

Designed for all-day, every-day use, the **S-100-SP Self-powered Label Slitter** is backed by LABELMATE's famous **3-Year Parts and Labor Limited Warranty**, assuring you trouble-free performance.
