

S-100, S-200, SLIT-100, SLIT-200, TWIN-SLIT-100

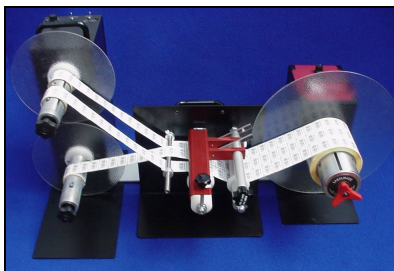

Heavy-Duty Label Slitters & Slitting Stations

Here's the most convenient, low-cost tabletop solution for slitting and rewinding narrow labels. LABELMATE Label Slitters allow you to print small labels several across ("up") and then slit them to the desired width. This multiplies your print efficiency by the number of labels across, and dramatically increases your print head life and ribbon usage efficiency. The rugged LABELMATE **S-100** and **S-200** Heavy-Duty Label Slitters are identical except for the width of labels they can handle. A Rewinder pulls the label web through the cutting blades.

The Slitters can be used either "in-line" or "off-line". In "in-line" use, the Slitter is placed between the printer output and the Label Rewinder. The slitting speed is determined by the printer output speed. In "off-line" use, the Slitter is placed between a UCAT Unwinder and a CAT-2 Rewinder or TWIN-CAT-2 Dual Spindle Rewinder / Unwinder. Off-line slitting is recommended for production work or for use with three or more blades. With slitting speeds up to 76cm/sec (30-ips) in "off-line" mode, you'll make fast work of your slitting jobs.

An optional six- (6) digit PC-1 Pre-set Counter allows you to pre-set the number of labels to be slit. When the counter reaches the preset number, it sends a "HALT" signal to the Rewinder. Power to the Rewinder motor is then shut off and braking is applied. You'll have no annoying label spills to contend with.

The easily-replaced slitting blades are click-adjustable, maximizing their useful life. Special, very sharp, ground steel blades are supplied with the S-100 and S-200 and are recommended for replacement. No tools are required for blade adjustment or replacement. During slitting, the blades are stabilized with LABELMATE's proprietary system, giving a clean cut at all speeds. Rugged, heavy-gauge welded steel construction and precision parts yield a product of the highest quality.

Complete TWIN-SLIT-100 Package

S-100 with PC-1 Counter

Complete SLIT-100 Package

MODEL	TWIN-SLIT-2 SLITTING PACKAGE DESCRIPTION Package includes all the items listed.	WEB WIDTH	SPEED

MODEL	Complete Money-Saving "Off-Line" Label Slitting Packages Package includes all the items listed.	WEB WIDTH	SPEED
SLIT-100-DELUXE	<ul style="list-style-type: none"> • S-100 Heavy-Duty Label Slitter with 2 Blade Holders & Blades; • CAT-2-CHUCK Heavy-Duty Rewinder; 3" dia. "Quick-Chuck" quick-locking Core Chuck is Standard; specify if 1.5", 40mm, 70mm or 4" diameter is desired instead. (Add \$50 for 4" dia. Quick-Chuck). Heavy-duty power supply is included. (Also available with 1" diameter Core Holder and an Adjustable Paper Guide in place of the "Quick-Chuck". Deduct \$100.); • CAT-2 Heavy-Duty Rewinder used as a variable tension-control Unwinder. Provides the maximum control over rewind tension. • 2 Aluminum and 2 Thin Plastic Separator Plates*; • Adjustable Locking Bar to lock units together in position; • HSB-10 High Speed Replacement Blades (10 Blades). 	Up to 6"	Up to 30 ips (inches per second)
SLIT-100-PACKAGE	<ul style="list-style-type: none"> • Economy package uses a UCAT-S Economy Label Unwinder with fixed brake in place of the CAT-2 Rewinder / Unwinder. The UCAT-S does not provide control over the rewind roll tension. 		
SLIT-200-DELUXE	<ul style="list-style-type: none"> • S-200 Heavy-Duty Label Slitter with 3 Blade Holders & Blades; • CAT-2-CHUCK-10 Heavy-Duty Rewinder with 10" wide "Quick-Chuck"™, quick-locking Core Chuck for 3" cores; • CAT-2-W10 Heavy-Duty Rewinder used as a variable tension-control Unwinder to provide the maximum control over rewind tension. • 2 Aluminum and 3 Thin Plastic Separator Plates*; • Adjustable Locking Bar to lock units together in position; • HSB-10 High Speed Replacement Blades (10 Blades). 	Up to 10"	Up to 30 ips
SLIT-200-PACKAGE	<ul style="list-style-type: none"> • Economy package uses a UCAT-1-W10 Label Unwinder with adjustable braking in place of the CAT-2-W10 Rewinder / Unwinder. The UCAT-1-W10 provides a limited control over the rewind roll tension. 		

*Keeps slit label rolls from interleaving or telescoping.

Separator Plates are available for your LABELMATE CAT-2 Label Rewinder. These precision-milled anodized aluminum Separator Plates keep your label rolls from sticking together after they have been slit. You will need the same number of Separator Plates as you have blades on your Slitter. Separator Plates are also available in thin plastic, often preferred for slitting to keep your roll spacing uniform. Please see the Catalog & Price List for all the latest options. Separator plates are not necessary for the TWIN-CAT-2 Dual Spindle Label Rewinder / Unwinder.

INDIVIDUAL SLITTER SPECIFICATIONS:

S-100 Label Slitter

S-200 Label Slitter

Size: HxWxD 305x305x305-mm (12x12x12-inches).

381x381x38-mm (15x15x15-inches).

Label Width: Up to 165-mm (6.5-inches).

Up to 254-mm (10-inches).

Number of blades: 2 included. Recommended max. 4

3 included. Recommended max. 5

Speed: Same as printer speed for in-line use. Up to 76cm/sec (30-ips) in off-line use.

Blade Holders: Additional Blade Holders **Model BH-1** are field installable. Includes blade.

Power: No power is required for the Slitter itself. A CAT-2 or TWIN-CAT-2 Rewinder is used to pull the labels through the cutting blades.

Replacement Blades: **HSB-10** Special Precision High Speed Cutter Replacement Blades for longest life and best performance. 10 blades are supplied in a convenient dispenser.

Optional: Model **PC-1** six- (6) digit Pre-set Counter to set batch size. 120vac 60Hz power required. 220-240vac 50Hz power supply available.

Warranty: 3-year Parts and Labor Limited Warranty. One-year Warranty on Pre-Set Counter & Power Supply.

Specifications are subject to change without notice.
