

LABELMATE

ADJUSTABLE PAPER GUIDE

- Model **APG-CAT** for the CAT-2 Label Rewinder
- Model **APG-MC** for the MC-10A & MC-11 Label Rewinders

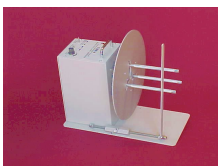

INSTALLATION

- 1) Remove the Acorn Nut, Lockwasher and regular Nut from one end of the Threaded Rod and slide the hexagonal Mounting Foot off the Threaded Rod.
- 2) Remove the two flat head Screws from the bottom of the Mounting Foot.
- 3) The Mounting Foot can be positioned on either the right or left side of the Rewinder Base Plate over the two screw holes. The Thumbscrew faces out, away from the Rewinder Case.
- 4) Insert the two mounting Screws through the bottom side of the Base Plate and into the screw holes in the bottom of the Mounting Foot. Tighten the Screws.
- 5) Insert the Threaded Rod through the Mounting Foot from the end nearest the ON-OFF Switch.
- 6) Screw the flat Nut approximately 1-inch onto the Threaded Rod. Slide the Lockwasher on.
- 7) Place the hole in the flat Paper Guide Arm over the Threaded Rod. The rounded side of the Guide Arm should face in, toward the Lockwasher.
- 8) Screw the two Acorn Nuts onto the Threaded Rod until they are tight. It will be helpful to use two wrenches, one on each Acorn Nut for this step.
- 9) Now tighten the flat Nut against the Lock Washer to secure the Paper Guide Arm to the Threaded Rod. Again, two wrenches will be useful.

Finished!

USE

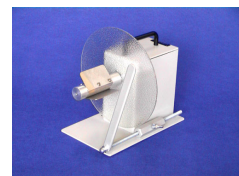

- 1) Loosen the Thumbscrew so the Threaded Rod can slide back and forth through the Mounting Foot.
- 2) Slide the Threaded Rod to the point where the Paper Guide Arm contacts the edge of the Label Web.
- 3) Rotate the Guide Arm in as desired.
- 4) Tighten the Thumbscrew to hold the adjustment.
- 5) To remove the rewound labels from the Label Rewinder, loosen the Thumbscrew and move the Adjustable Paper Guide out of the way.
- 6) Enjoy the convenience of your new Adjustable Paper Guide.
